Traditional Genealogy

- Run genealogy program on your home computer
- Enter all the data yourself
- Others may be doing same thing (same family)
- Update your data as you discover new information
- Publish
 - Print
 - Web (static HTML pages)
 - DVD (audio and video)

Problems of Traditional Genealogy

- Data entry is time consuming and error prone
- Several people working on the same family records is a waste of resources
- Published information is rapidly out of date
- Republishing is time consuming and expensive
- Privacy issues (esp website)
- Traditional web publishing does not scale well for very large family trees
- Collaboration with others difficult (but email helps)
 - Review previously published data (time consuming)
 - Exchange GEDCOM files (difficult to merge)

The PhpGedView Solution

- Collaboration
 - Data is online and editable
 - Multiple people can work on the same tree at the same time
 - Site administrator can review the changes of others before making them permanent
 - Swapping GEDCOM files unnecessary
- Data is searchable

The PhpGedView Solution

- Web pages and reports are generated dynamically
 - Data is always up to date
 - No need to republish
- Privacy
 - Good control over sensitive data (who sees what)
- Open Source
 - Free software in the public domain (SourceForge project)
 - Modify the code yourself or submit bug reports and feature requests

PhpGedView

- www.phpgedview.net
- Free download available
- Windows demo
- Hosting sites available for those with no website
- Supports multiple trees (GEDCOMs)

PhpGedView

- Documentation
 - User Guide
 - Admin Guide
 - How To's
 - FAQ
- User Types
 - Visitor (public)
 - Private User (user name and password)
 - Editor
 - Administrator

PhpGedView Charts

- Ancestry and Descendancy
 - List, Booklet, Individuals and Families
- Circle Diagram
- Compact Chart
- Family Book Chart
- Interactive Tree
- Lifespan Chart
- Pedigree Chart
- Relationship Chart

PhpGedView Reports

- Available in PDF and HTML format
- Reports
 - Ahnentafel
 - Birth Date and Place
 - Birth, Death, Marriage
 - Descendency
 - Relatives
 - Family Group
 - Individual
 - Marriage Date and Place
 - Pedigree

PhpGedView Lists

- Branches
- Families
- Individual
